EDUCATION

National University of Computer and Emerging Sciences

Bachelors in Computer Science (GPA: 3.94)

National Highway, Karachi

August 2022 - June 2026

Achievements: Dean's Honor List - Fall'22 Semester - Spring'26 Semester (8 semesters)
Rector's List - Spring'24 Semester, Spring'26 Semester

Coursework: Data Structures, Object Oriented Programming, Database Systems, Software Engineering, Artificial Intelligence, Deep Learning for Perception, DevOps, Agentic AI, Recommender Systems, Agile for Project Management

EXPERIENCE

Java Intern

December 2025 – February 2026

10pearls

- Developed a contact management system in Springboot with secure user authentication, CRUD-based contact management, pagination, and search/filtering, following RESTful API design principles.
- Improved backend reliability and maintainability through logging, unit testing, and static code analysis.
- Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, SQL Server, SLF4J, JUnit, Mockito, SonarQube

Developer Intern

June 2025 – July 2025

MazikGlobal Pakistan

- Developed .NET 8 backend services using EF Core with Azure Function Apps, implementing data models and repositories for an AI powered project management platform with interfaces for clients, freelancers, and admin.
- Built frontend pages using React + Vite with real-time Kanban boards for team collaboration and client tracking.
- Integrated AI capabilities, including LLM-powered resume parsing (extracting skills, projects, and experience), intelligent freelancer matching, and an ElevenLabs conversational agent for AI-generated meeting summaries.

PROJECTS

Qadam | *React, TypeScript, Node.js, Express, Supabase, pgvector, Clerk, Gemini, Hugging Face, Vercel, DigitalOcean*

- Developed an AI-powered platform connecting volunteers with NGO projects through hybrid matching combining geographic distance, skills, interests, and semantic similarity; implemented QR-based attendance and verified impact tracking.
- Built AI NGO Copilot and RAG-based Knowledge Assistant for project creation and organizational knowledge, with automated project guidance, document-grounded responses, and scalable cloud-based architecture.

EstateFlow | *FastAPI, Langraph, RAG, Calendar MCP*

- Developed a property maintenance platform featuring a 10-node LangGraph multi-agent pipeline that automates maintenance request triage, geolocation-based vendor matching, and real-time WhatsApp communication between vendors and tenants.
- Integrated a PostgreSQL (pgvector) RAG pipeline to enable natural-language querying of maintenance histories and Google Calendar MCP for scheduling.

Smart Retail Operations Monitor | *n8n, Node.js, Express.js, Redis, PostgreSQL, React.js*

- Built an event-driven operations issue monitoring system using google forms and n8n to collect incident reports (low stock, delays), automate Slack/email alerts, and visualize operational problems through a real-time dashboard
- Developed a backend intelligence engine with event deduplication, dynamic severity escalation, store risk scoring, and time-window analytics to detect recurring operational issues

HRMS CI/CD Pipeline | *GitHub Actions, Digital Ocean, Docker, Docker Compose, SonarQube, Snyk, Node.js*

- Containerized the multi-tier application (Frontend, Backend, and Nginx reverse proxy) with Docker and Docker Compose to eliminate environment drift, ensuring high consistency and reproducibility in production.
- Automated the cloud delivery workflow via GitHub Actions to deploy to DigitalOcean, integrating static analysis and automated vulnerability scanning (SonarQube, Snyk) for secure, zero-downtime shipping.

CERTIFICATIONS

Clickup Qualified Services Consultant

Microsoft Certified: Azure Fundamentals and Azure AI Fundamentals

TECHNICAL SKILLS

Languages: C/C++, SQL, Python, HTML/CSS, JavaScript, Java

Frameworks: React.js, Node.js, Express.js, Next.js, Material-UI, Flutter, Java SpringBoot, .NET, Langraph, FastAPI

Databases: Oracle SQL, PostgreSQL, SQL Server, Supabase, Firebase, MongoDB

Project Management: Jira, Clickup

Developer Tools and Cloud: VS Code, Visual Studio, Git, IntelliJ IDEA, AWS, n8n
